

Welcome to the VENTS world

Fresh air for your home

A decorative graphic in the bottom right corner consisting of a large red curved shape and a smaller blue triangular shape pointing upwards.

About the company

- VENTS – worldwide leader of ventilation production
- Company was founded in the **90th** of the last century
- In **2012** Vents became a part of Blauberg Group (Germany)
- The largest production base in Europe - **90 000 m²** production facilities, 16 workshops
- Solid team of **3 500 professionals**
- The products are sold via an extensive network of distributors in **110 countries**
- Powerful research, development and production enterprise
- Above **30 000** production items
- Unified up-to-date industrial complex
- Closed-loop manufacturing cycle
- Ideas, developments, implementation of new products
- Self-contained production

**VENTS company is the
leader for development
and implementation of
technological innovations**

Metal Processing

Only ultra modern high-tech equipment enable production of any components for complex ventilation systems

- Sheet bending and coordination presses
- Automatic cutting centers
- Welding equipment
- Plate rolling machines
- Metal cutting machines
- CNC drilling and thread-cutting machines
- CNC bending machines

Air Duct Production

- SPIROVENT spiral-seam air ducts
- SPIROVENT fittings
- POLYVENT, ISOVENT, ALUVENT, THERMOVENT flexible air ducts

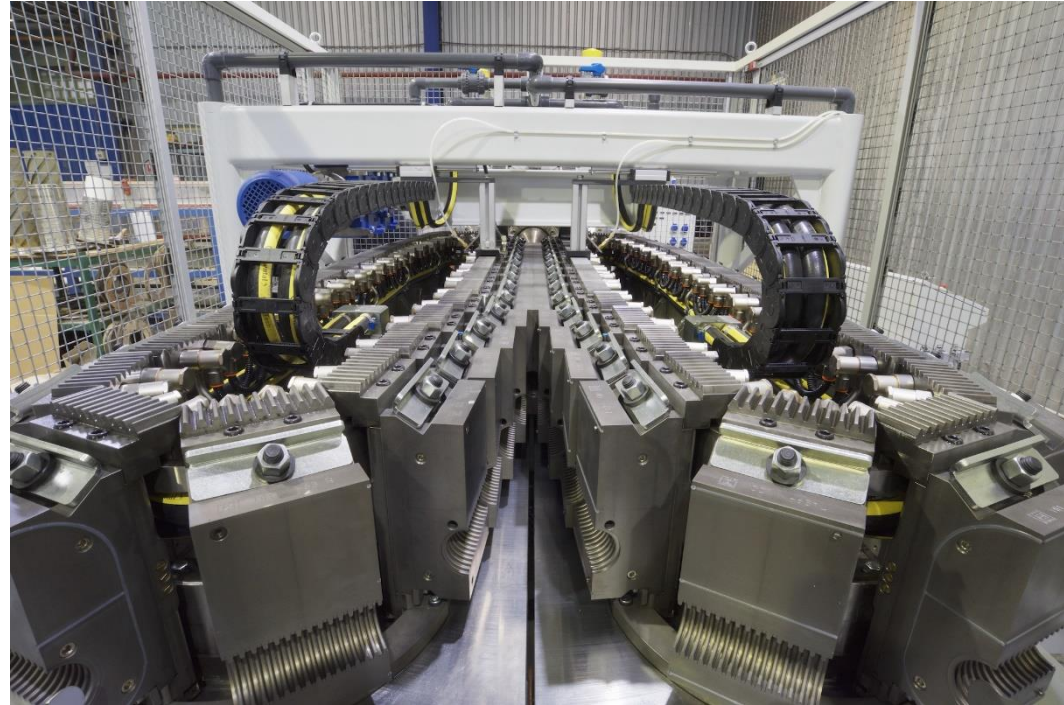

Metalwork Painting

- Automated lines
- Polymer coating
- Unique technologies
- Zinc phosphate metal coating
- Noncorrosive coating
- Wide color palette

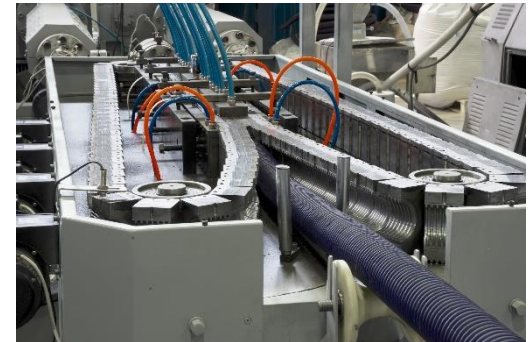

Processing of semi-rigid air ducts

- The line allows for production of semi-rigid round air ducts with diameters of **63, 75 and 90 mm**, as well as flat-oval air ducts with **50x115 mm** dimensions.
- The production line is fully automated and has a number of design features, which ensure even better workflow productivity and manufactured products quality.
- In particular, cooling system utilized in the production line allows for high-speed operation **up to 14 meters per minute**, which is much higher than any similar equipment may offer.
- Air ducts tightening is performed in an automatic mode.

Extrusion

- 7 high-efficient extrusion lines
- 3 co-extrusion lines
- Production of plastic ventilation ductworks PLASTIVENT – the widest product range in the world
- Production of cable ducts and profiles for PROFIPLAST ventilation grilles

Injection moulding

- More than 100 modern automatic molding machines
- 10 polymer types
- Own tools and molds
- Round-the-clock workshop operation
- Plastic parts of any complexity
- Waste-free production
- Equipment for recycling of secondary raw materials

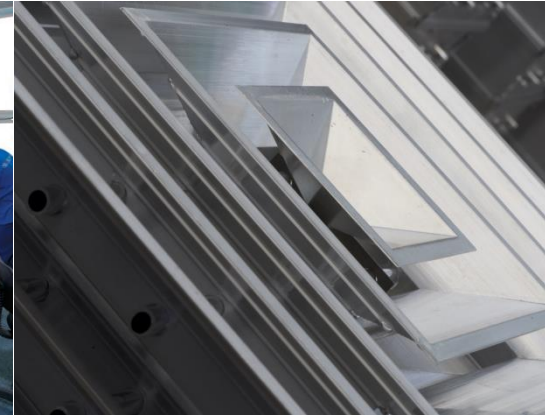

Assembly Workshops

VENTS is a full scale manufacturing starting from idea and development and finishing with final products assembly and packing

Ventilation grille assembly

- Wide range of domestic ventilation grilles
- Automated packing lines
- Synchronous assembly of up to 50 various items

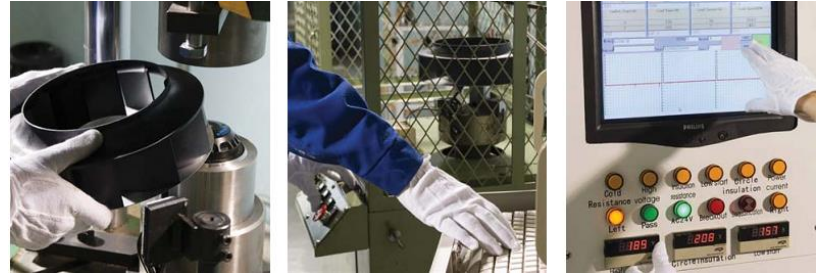

Domestic fan production

- 6% of the total domestic fan production share worldwide
- **500 thousands** domestic fans are produced monthly
- Ongoing product diversification
- A great variety of models, design, functions
- Implementation of innovative energy efficient components
- Product compliance with international standards

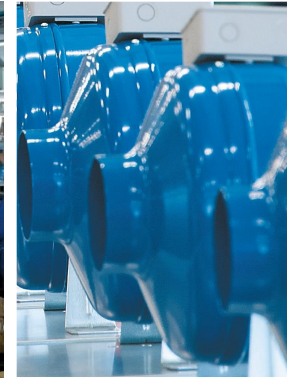

Electric motor production

- Production of electric motors for industrial and commercial fans
- Each motor undergoes dynamic balancing
- Thorough check and testing at each production level

Industrial fan production

- **100 thousands** industrial fans are produced monthly
- Hi-tech equipment
- The total range of industrial fans and ventilation components engaged
- Modular ventilation system components

Electric equipment production

- Modern technologies
- Production of control and automation equipment
- Production of control blocks, controllers, air handling unit automation, control boards

Air handling unit Production

- Production of air handling units with various power, functional and application characteristics
- **10 thousands** air handling units are produced monthly
- Energy-efficient EC motors
- Heat exchangers of own production
- iPad/iPhone controllable units
- Integration into smart house system

Production of frame modular units

- **500 frame modular units** are produced monthly
- Air handling units for arrangement of multi-functional systems
- Modularity, flexibility, functionality
- Reliability, quality, energy efficiency
- Integrated automation
- Air capacity up to 100 000 m³/h

Welcome to the VENTS world/Vents Products

Vents Products

VENTS products are designed for all ventilation market segments

Partnership and quality

- Strong exhibition activity
- Complex trade and marketing support
- Education and seminars
- Design and submission of marketing tools, planograms, demo equipment, POS materials for DIY worldwide
- Analysis and selection of the most suitable products

Vents in DIY chains

International Certification

- Certificates of major international institutions and organizations;
- Certification of production ISO 9001:2000;
- BSI Certificate of Constancy of Performance in respect of specification for powered smoke and heat control ventilators;
- Full membership in international associations.

VENTS logistics

- Optimized logistics
- Product delivery anywhere as soon as possible
- Optimized control of trade flows

VENTS global distribution network

- VENTS products export to more than **110 countries**;
- Affiliate network of about **700 companies**;
- VENTS representative offices in Ukraine (head quarter), Poland, Hungary, Russia, USA
